Dear Hiring Manager,

I am a frontend development student at Noroff with practical experience building responsive, accessible web interfaces and a strong foundation in HTML, CSS and JavaScript. I have previously worked as substitute teacher, assistant in a nursing home, prison officer, bartender and factory employee.

Throughout my studies, I have gained solid knowledge in various areas such as HTML, CSS and JavaScript, and I have experience with Git, GitHub, VSCode and Figma. In the first year at Noroff I have completed several projects, including responsive websites, interactive JavaScript applications and a full e-commerce frontend integrated with a live API. Through these projects I have learned to use version control effectively, collaborate in agile team environments, create responsive layouts and to write and structure clean code.

As my experience may demonstrates, I feel that I have strong communication and collaboration skills, perform well under pressure and am driven to quickly learn new technologies, adapt to changing requirements, and deliver high-quality results.

I am open to various opportunities, but I am particularly interested in roles where I can continue to learn and grow in a modern tech environment such as internships, junior developer roles and collaborative projects. I am excited to collaborate with talented developers and contribute to innovative projects and create impactful digital experience that make a difference.

I would welcome the opportunity to further discuss how I can contribute. You can reach me at 47675659 or fabianaugustskjellestad@gmail.com. Thank you for considering my application.

Sincerely,

Fabian August Skjellestad
