PROJECTS

Design Project

UX prototype using Figma

- Designed and developed a high-fidelity e-commerce prototype in Figma, applying principles of UI design, wireframing and prototyping.

Responsive Website

HTML and CSS

- Developed a fully responsive multi-page website based on my own design from the design project.

Project Methodology

GitHub Projects

- Created a structured project plan using GitHub Projects, including KanBan and roadmap view.

Responsive Website Science Museum

Figma, HTML, CSS and GitHub Projects

- Designed and developed a responsive website for a science museum. Used GitHub Projects for planning.

Interactive Store

JavaScript, API

- Built an interactive online store using JavaScript and Fetch API to display different products from an external API and enable a client-side shopping basket.

Open Source Team Contribution (Developer)

HTML, CSS, JavaScript

- Worked as a developer in an agile team. Participated in sprint planning, managed task via GitHub project, delivered code through branches and pull request in coordination with Scrum Master

E-commerce Front-End Application

Figma, HTML, CSS, JavaScript

- Planned, designed and developed a responsive web client for an existing e-commerce API using vanilla JavaScript. Implemented registration/login feature and a purchase checkout flow.
